

ENTERPRISE-READY ENGINEERING DELIVERY · SINCE 2016

## We build what most firms say is too complex.

Sevendyne Consultancy Services LLP (Kochi, India, est. 2016) is an enterprise-ready solution provider for buyers in the United Kingdom, Germany, Malaysia, and the UAE. We deliver business applications, AI automation pipelines, and specialist systems engineering — with governed teams, 100% IP transfer, and transparent 15% pricing.

Executive summary for CTOs and procurement: active client programmes since 2016 — proof on [sevendyne.com/portfolio](https://sevendyne.com/portfolio) and [case studies](#).

### 2016

Founded — Kochi,  
Kerala, India

### Long-term

Dedicated client programmes —  
selective on new intake

### UK+DE+UAE

Primary markets —  
enterprise programmes

### 100%

IP transfer  
to client by default

#### WHAT SEVENDYNE DOES

- 01 Solution delivery**  
Governed delivery teams for business platforms, AI automation, and systems programmes — built at operational cost under five-pillar governance. See [sevendyne.com/offshore-app-development](https://sevendyne.com/offshore-app-development).
- 02 100% IP transfer**  
Sevendyne acts as your elite technical vendor. The moment the code is written, all Intellectual Property and source code transfers directly to you — no vendor lock-in, no retained codebase.
- 03 Transparent 15% model**  
We show you the actual developer salary and add a flat 15% for infrastructure and governance — elite engineering without the middleman tax. See [sevendyne.com/pricing](https://sevendyne.com/pricing).

#### BUILT FOR ENTERPRISE DELIVERY

### Five-pillar delivery infrastructure

Foreign CTOs and procurement managers buy capabilities and departments — not individual CVs. Sevendyne maps every programme to five operating pillars so risk is distributed and milestones survive personnel rotation.

#### PILLAR 01

##### Executive Architecture

Sevendyne Enterprise Architecture Office

Twenty years of systems architecture: high-level design, database schemas, integration boundaries, and scalable foundations before execution accelerates.

PILLAR 02

Technical Management & Client Delivery  
Technical Delivery Managers

Agile sprint governance, technical client communication, code reviews, and milestone tracking – without dragging your product owners into daily implementation.

PILLAR 03

Engineering & Execution

Core delivery teams & engineering network

Vetted execution across business platforms, AI pipelines, and systems engineering – shielded from meetings so engineers focus on production-grade output.

PILLAR 04

Operations & Client Success

Operations & administration desk

Logistics, communication routing, and resource allocation across UK, EU, and GCC time zones.

PILLAR 05

Legal, Compliance & Governance

Legal & compliance desk

International contracts, IP protection, cross-border EOR frameworks, and GDPR-aligned data compliance.

Bus factor: If the principal architect is on another programme, Technical Delivery Managers, Operations, and delivery teams maintain sprint continuity – Legal preserves contract and IP posture.

ONE STUDIO, NOT A VENDOR PANEL

### Generic agency vs Sevendyne (solution provider)

DIMENSION	GENERIC OFFSHORE AGENCY	SEVENDYNE (SOLUTION PROVIDER)
Scope	Body shop – developers on hourly rates, no IP clarity	Solution delivery for business, AI, and systems programmes – operational cost, 100% IP transfer – <a href="https://sevendyne.com">sevendyne.com</a>
Pricing	Hidden markup on developer rates	Transparent 15%: actual salary shown + flat 15% for infrastructure and governance
IP	Vendor retains codebase or unclear assignment	100% IP transfer by default – you own the code from day one
Depth	Generalist profiles, short engagements	Multi-year programmes – Malaysia fintech & logistics, Wise Owl property, German data analytics – <a href="#">case studies</a>
Fit	Teams seeking cheapest hourly rates	Founders and CTOs who need a governed solution partner, not a middleman

THE TRANSPARENT 15% MODEL

Pricing formula: Monthly invoice = Pass-through + (15% × pass-through). We show you the real cost – no hidden agency markup. Infrastructure, governance, and programme management included in the flat 15%.

COMPONENT	WHAT YOU SEE	WHAT YOU GET
Developer salary	Actual pass-through at cost	Engineers matched to your programme – stack proof at <a href="#">portfolio / technical skills</a>
15% infrastructure fee	Flat, transparent, no surprises	Programme governance, delivery ops, compliance, and senior oversight
IP transfer	Included by default	100% source code and Intellectual Property transfers to you
Role bands	Published on <a href="https://sevendyne.com/pricing">sevendyne.com/pricing</a>	Junior through senior engineering profiles · currency per proposal

Commercial note: signed proposals supersede website figures · multi-year programmes preferred · scope confirmed on a qualified call.

CASE SNAPSHOTS – ACTIVE CLIENT EXPERIENCE

Full buyer write-ups: [sevendyne.com/case-studies](https://sevendyne.com/case-studies) · Programme portfolio: [sevendyne.com/portfolio](https://sevendyne.com/portfolio)

#### Malaysia — RedDotPayment CRM (2021–2022)

Payment CRM with CodeIgniter/PHP, EMI workflows, and QR commerce companion apps. Founder-led governed delivery.

#### Malaysia — TLMS logistics (2019–2020)

Laravel, Vue, and REST API logistics platform for shipment and order-to-delivery tracking.

#### India — Wise Owl property (2015–2016)

Property management platform — listings, tenants, brokers. Early founder delivery anchor.

#### Germany — Data analytics (since 2024)

Python and data engineering team built from scratch; ongoing engagement.

## WHO THIS IS FOR

---

### Enterprise CTOs & VPs Engineering

Leaders running multi-year business, AI, or systems programmes who need departmental depth, audit-ready governance, and 100% IP transfer.

### Procurement & programme directors

Buyers in the UK, Germany, and UAE who require contract clarity, EOR options, and predictable India delivery economics.

### Industrial & automation buyers

Organisations shipping industrial automation, navigation, or operator-facing native software with long-horizon maintenance expectations.

## EXECUTIVE ARCHITECTURE

---

Sevendyne Enterprise Architecture Office anchors Pillar 01. Sevendyne pairs principal-level architecture with four additional departments so enterprise programmes inherit structure, not personality-driven delivery. Transparent 15% pricing · 100% IP transfer · governed delivery since 2016.
