Angular Data Analytics

We built REST APIs, custom Angular components, Ngrx forms, and integrated D3.js and Apache eCharts for dynamic data visualization in an intuitive dashboard UI.

The screenshot shows the Spree Commerce admin interface. The main content is a table of orders with columns for 'COMPLETED AT', 'NUMBER', 'DICKY', 'STATE', 'PAYMENT STATE', 'SHIPPING STATE', 'EMAIL', and 'TOTAL'. The table contains several rows of order data with status indicators like 'complete', 'paid', 'shipped', and 'pending'.
